

Air Cushion Protected Intelligent Distribution Box

Overview

The Air Excellent DB816 is designed to radially distribute air from a ventilation unit, minimizing system pressure drop, fan energy use, and sound levels. It is compatible with Aerfoam insulated ducts and features 16 Air Excellent AE34C duct connections. VAT Relief allows a person who has a long-term illness or a permanent disability to buy eligible items without having to pay VAT therefore saving 20% on the normal VAT inclusive price. Most of the products which can be purchased from Manage At Home are available for an eligible person to purchase. The Dyna-Tek® Intelligent Air cushion sets a brand new standard in innovative wheelchair seating, delivering superior 'bespoke' pressure redistribution without the need for any set up or re-pumping air lost over time. Utilising Reactive Airflow technology, the system of air and foam-filled cells incorporates a patented valve system which displaces and adjusts air distribution in response. When it comes to air cushion packaging, one size doesn't fit all. Demonstrating more effective pressure redistribution than the market leading.
