

Cable laying horizontal cable tray turning wheel

AI Overview

Horizontal cable tray turning wheels, or corner cable rollers, are designed to guide cables smoothly around bends, reducing friction and protecting the cable sheath during installation.

Overview

Horizontal cable tray turning wheels are specialized cable rollers used in cable management systems to facilitate the smooth routing of cables along horizontal trays, particularly at corners or bends. They help reduce pulling forces, prevent damage to the cable sheath, and simplify installation for both light and heavy cables .

Types of Horizontal Cable Rollers

- Corner Cable Rollers
 - Designed specifically for 90° or angled turns in horizontal cable trays.
 - Available in light, medium, and heavy-duty versions depending on cable weight and diameter.
 - Examples include the BR1, BR2, and BR7 series for cables up to 130–210 mm in diameter .
- Quadrant or Skid Plate Rollers
 - Used for smooth directional changes without sharp edges.
 - Often combined with corner rollers to support soft or sensitive cables .
