

Construction of China Tower Communication Base Stations

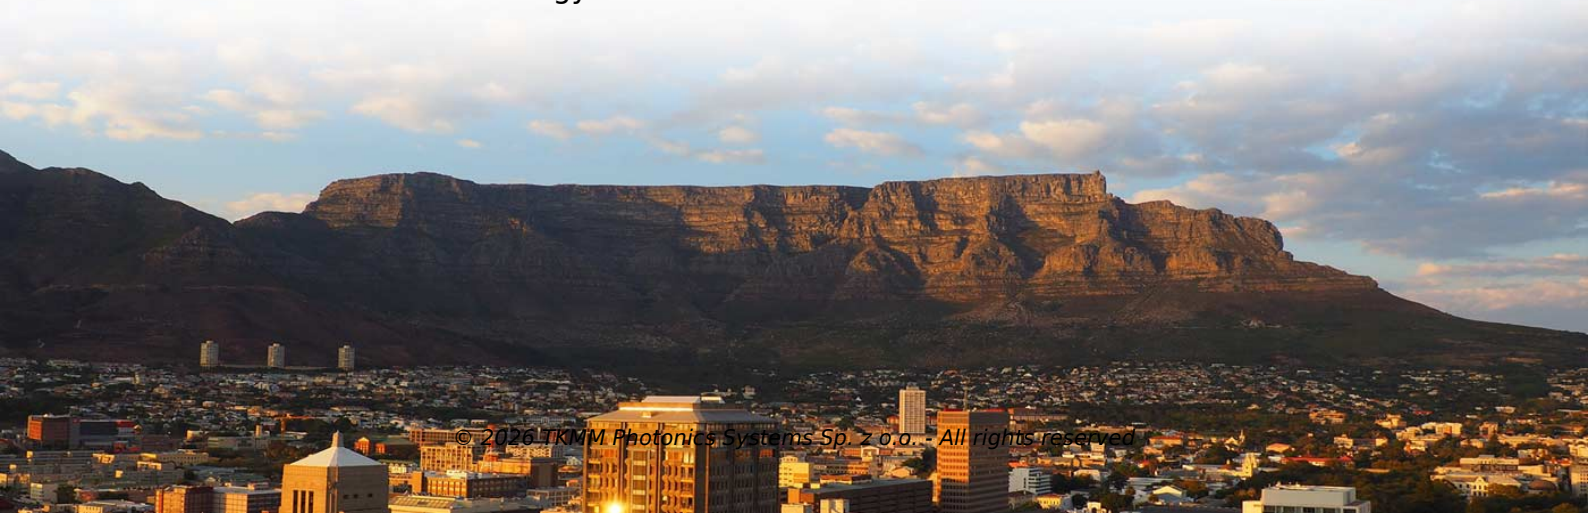

AI Overview

China Tower is the primary builder and operator of China's 5G and telecom base stations, managing over 2 million towers and planning to expand to more than 4.5 million 5G sites by 2025.

Scale and Deployment

China Tower is the world's largest telecommunications tower infrastructure provider, operating and managing over 2.094 million tower sites across 31 provinces, municipalities, and autonomous regions in China, serving nearly 3.8 million tenants with a tenancy ratio of 1.81 . By the end of 2022, the company had installed 2.05 million telecom towers, including approximately 745,000 5G base stations, with most new sites leveraging existing infrastructure to optimize costs and efficiency . China plans to construct over 4.5 million 5G base stations in 2025, reflecting a continued push to expand 5G coverage nationwide and support emerging technologies such as AI, IoT, and smart industrial applications . These deployments are coordinated with major state-owned telecom operators: China Mobile, China Telecom, China Unicom, and China Broadnet .
