

Costa Rica Optical Cable Project

Overview

Limón, Costa Rica — LIMÓN, Costa Rica - A new era of digital connectivity dawned on Costa Rica's Caribbean coast this week as the state-owned Instituto Costarricense de Electricidad (ICE) officially welcomed the landing of the TAM-1 submarine fiber optic cable. These cables ensure the country has reliable, high-speed internet, supporting businesses, remote workers, and the growing digital. These Terms and Conditions ('the Terms') govern your use of the website on the Internet located at [www. com](http://www.com) ('the Site') and are legally binding on you. The Site is owned and operated by Developing Telecoms Limited ('the Owner', 'we', 'us', 'our'). Please read the Terms before. Nexans has started production of TAM-1, a new fiberoptic submarine cable network owned by Trans Americas Fiber System. From the BU, 20 fiber pairs are directed. Costa Rica will soon plug into a next-generation submarine cable system that promises to transform the nation's internet capacity and strengthen international connectivity.
