

Distribution boxes that need to be suspended

AI Overview

Suspended distribution boxes are overhead power units designed to save space and provide flexible, safe access to electrical outlets in workshops, factories, garages, and other environments.

Types and Configurations

Suspended distribution boxes come in various forms:

- Fixed chain units: These are hung from the ceiling using chains of different lengths, providing a stable overhead power source with multiple socket outlets ().
- Retractable units: These allow the box to be lowered to a working height and retracted back up when not in use, improving safety and workspace efficiency ().
- Hanging combination units: These can include CEE, SCHUKO®, and data sockets, and are available in different industrial series such as AMAXX®, 3KRAFT®, AirKRAFT®, and DELTA-BOX ().

Socket Options

Suspended units can be customized with a variety of sockets:

- Standard 13A UK metalclad or white molded sockets
- USB outlets
- Industrial sockets like 16A or 32A (IEC 60309/BS 4343)
