

Finished 135-degree elbow cable tray

Overview

The Trough Type 135° Horizontal Elbow is a core accessory of the trough cable tray system, specially engineered to achieve a 135-degree horizontal direction change for horizontal trough cable trays. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. It guides cables to turn smoothly at a 135° angle in the horizontal plane, standardizes wiring. Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray is intended for instrumentation and control applications that require.
