

How much does a ribbon fiber optic cable fusion splicer cost

AI Overview

Ribbon fiber optic fusion splicers typically cost between \$2,300 and \$9,000, depending on features and fiber capacity.

Price Range and Examples

- High-end ribbon fusion splicers designed for data centers and large-scale FTTH deployments, such as the Ribbon Fusion Splicer capable of splicing up to 12 fibers simultaneously, are priced around \$8,799.99 . These models offer rapid splicing, core alignment, and minimal splice loss, making them ideal for high-volume, high-precision applications.
- Mid-range or palm-sized splicers for single-fiber or smaller ribbon applications, like the QBL Palm Fusion Splicer, cost approximately \$2,349.99 . These are portable and suitable for fieldwork, emergency repairs, or smaller FTTH installations.
- Advanced kits like the Sumitomo Q102-M12+ Quantum Ribbon Fiber Splicer include dual built-in heat shrink ovens, auto-clamping adjustment, and multiple fiber holders. While exact pricing is not always listed publicly, these high-tech splicers are typically in the upper range of \$8,000-\$10,000 due to their AI-enabled features, multi-fiber capacity, and professional-grade precision .

Factors Affecting Cost

- Number of fibers spliced simultaneously – Ribbon splicers can handle 4 to 24 fibers per ribbon, with higher capacity models costing more .
