

How much does a roadside electrical distribution box cost in Namibia

AI Overview

A roadside electrical distribution box in Namibia typically costs between NAD 5,000 and NAD 25,000, depending on specifications, materials, and customization.

Price Range and Factors

The cost of a distribution box varies widely based on several factors:

- **Material:** Metal enclosures (stainless steel 304/316) for coastal corrosion resistance are more expensive than high-impact ABS plastic boxes, which are rustproof and lighter .
- **Voltage and Components:** Low-voltage boxes with fuses, relays, circuit breakers, and connectors cost less than high-voltage or fully configurable units .
- **Customization:** OEM branding, internal mounting plates, cable entry knockouts, and ventilation features can increase the price .
- **Size and Capacity:** Larger boxes designed for multiple circuits or higher amperage are more costly.
- **Shipping and Lead Time:** Imported boxes from South Africa or China may add shipping costs (30–40 days transit to Walvis Bay) and customs duties .

Typical Examples

- **Standard low-voltage roadside box:** NAD 5,000–NAD 10,000 for basic ABS or metal enclosures with standard breakers.
