

How much does it cost to install a wall-mounted distribution box

AI Overview

The typical cost for a wall-mounted distribution box installation ranges from \$100 to \$800, depending on the box type, material, and installation complexity.

Hardware Cost

The price of a wall-mounted distribution box varies widely based on specifications, material, and features. Standard residential units typically cost \$30 to \$100 for basic metal or plastic boxes, while more advanced or commercial-grade units with higher amperage, multiple circuits, or smart monitoring features can cost significantly more. Wholesale or bulk orders from manufacturers may reduce per-unit costs, sometimes starting as low as \$0.13 per unit for basic models.

Installation Cost

Professional installation is recommended to ensure safety and compliance with electrical codes. For a straightforward residential installation, labor costs typically range from \$100 to \$300, which includes mounting the box, connecting circuits, and testing. More complex installations—such as those requiring additional wiring, outdoor weatherproofing, or integration with existing systems—can increase total costs up to \$800 or more.

Factors Affecting Total Cost

- **Material and Durability:** Metal boxes are more expensive but offer better protection and longevity compared to plastic units.
