

How to bundle cables to cable trays

Overview

The main cable tray connection methods include splice plates, bolted connections, quick connect systems, fish plates, clamps, and welding. Choosing the right one depends on project conditions, load, maintain spacing or to keep cables in place when the tray is erect the minimum bend radius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray is intended for instrumentation and control applications that require. This guide covers the critical steps, from selecting the right electrical cable tray and performing accurate cable fill calculations to managing a safe cable pull through and ensuring all bonding and grounding requirements are met. In this helpful cable tray installation guide, we cover the importance, advantages and step-by-step processes to enhancing cable management in your facility. Lenson Select have a wide range of products available for your project.
