Find many great new & used options and get the best deals for Anritsu MS9710B Optical Spectrum Analyzer/ at the best online prices at eBay! Free shipping for many products! The Anritsu MS9710B Optical Spectrum Analyzer is a diffraction-grating spectrum analyzer for analyzing optical spectra in the 0. In addition to uses such as measurement of LD and LED spectra, it has functions for measuring the transmission characteristics of passive. The MS9710B provides excellent wavelength accuracy and waveform shape. The diffraction grating spectrum analyzer covers a wide range from 600 to 1750nm. Anritsu MS9710B products for sale at Test Equipment Center are thoroughly tested, and receive electrical and cosmetic reconditioning as needed prior to sale.
