

Nordic cable tray prices and usage scenarios

AI Overview

Nordic cable tray prices vary depending on material, size, customization, and installation requirements, with X-Tray being a premium, high-quality option.

Product Overview

Nordic Wire Tray offers the X-Tray series, a premium cable tray system designed for flexibility, high load capacity, and easy installation. The trays are available in multiple materials and surface treatments, including stainless steel, which affects durability and cost. X-Tray is designed with the longest bracket spacing in the market, reducing the number of parts and installation time, which can lower overall project costs.

Factors Affecting Price

- **Material and Surface Treatment:** Stainless steel or coated finishes are more expensive than standard steel options.
- **Tray Size and Load Capacity:** Wider or heavier-duty trays cost more due to additional material and structural requirements.
- **Customization:** Custom lengths, bends, or special configurations increase cost compared to standard stock items.
- **Installation Efficiency:** Fewer fasteners and simplified assembly (M8 bolts, minimal tools) can reduce labor costs, indirectly affecting total project expenditure.
- **Order Volume:** Larger industrial orders may benefit from bulk pricing, while smaller retail or project-specific orders may have higher per-unit costs.
