

# Power distribution box inside the network cabinet

## Overview

Rack power distribution units, also known as rack PDUs, are a key component to any IT environment. As the name suggests, they distribute power to network equipment within racks. Each rack must safely deliver stable electrical power to dozens of servers, switches, and storage devices while maintaining reliability, airflow efficiency, and electrical safety. Belden PDUs are designed to facilitate seamless integration into Belden racks and cabinets. This cabinet integrates components such as circuit breakers, transformers, and monitoring devices to safely and reliably manage power distribution across different. Olabs' FiberFlex™ Power Distribution Units (PDU) are an essential element in managing power capacity and functionality for server racks, wallmount racks, LAN racks in either data centers, offices, universities or any network facilities that require power distribution into server racks or cabinets.
