

Price of Fiberglass Integrated Tin Box

AI Overview

The price of a Fiberglass Integrated Tin Box typically ranges from \$5 to \$50 per unit, depending on size, customization, and supplier.

Fiberglass Box Pricing

Fiberglass enclosures are available in various sizes and types, including corrosion-resistant, compartmented, and washdown enclosures. Suppliers like DigiKey and McMaster-Carr offer fiberglass boxes with prices generally starting around \$5 to \$30 for standard sizes, with larger or specialized enclosures costing more. East Coast Fibreglass in the UK provides a wide selection of GRP (glass-reinforced plastic) products, often with next-day delivery, though pricing depends on dimensions and specifications.

Tin Box Pricing

Tin boxes, which may be integrated with fiberglass for hybrid enclosures, vary in cost based on size, material thickness, and customization. Small tin boxes (2-4 inches in diameter) typically cost \$0.20 to \$1.50 per unit, while medium-sized boxes (5-8 inches) range from \$1.50 to \$4.00 per unit. Customization such as printing, embossing, or special coatings can increase the price by \$0.50 to \$4.00 per unit.

Factors Affecting Price

- **Size and Volume:** Larger boxes require more material and are more expensive. Bulk orders can reduce per-unit cost.
- **Material Integration:** Combining fiberglass with tin may increase manufacturing complexity, raising the price.
