

Price of external wall cable tray supports

AI Overview

External wall cable tray supports typically range from \$10 to \$100+ per unit depending on material, size, and load capacity.

Overview

External wall cable tray supports, also called mounting brackets, are designed to secure and stabilize cable tray systems along walls in industrial, commercial, and data center environments. They ensure proper load distribution, maintain alignment, and allow safe routing of power and data cables along structural surfaces . These supports are compatible with various tray types, including wire mesh, ladder, and basket trays .

Factors Affecting Price

- **Material:** Supports are commonly made from galvanized steel, stainless steel, or aluminum. Stainless steel and heavy-duty galvanized options are more expensive due to durability and corrosion resistance .
- **Load Capacity:** Brackets designed for heavy power cables or long spans cost more than light-duty supports for small data cables .
- **Design and Size:** Adjustable or specialized brackets for unique wall configurations or large trays increase the price.
- **Brand and Supplier:** Premium brands like Legrand, Cablofil, or Schneider Electric may charge higher prices compared to generic suppliers .

Typical Price Range

- **Light-duty supports:** \$10-\$25 per bracket
