

Price of large-capacity household electrical distribution boxes

AI Overview

Large-capacity household electrical distribution boxes typically range from \$100 to \$600 or more, depending on amperage, number of circuits, materials, and additional features.

Price Range and Factors

The cost of a household distribution box varies widely based on capacity, brand, and features. Basic models for residential use start around \$100–\$200, while premium or high-capacity panels with advanced features such as surge protection, smart monitoring, or modular designs can cost \$400–\$600 or more. Factors influencing price include:

- Amperage rating: Common household panels range from 100A to 200A, with higher amperage panels costing more.
- Number of circuits: Panels with more spaces for breakers (e.g., 12, 24, or 40 circuits) are more expensive.
- Material and durability: Steel enclosures are more robust and pricier than plastic ones, and some boxes are designed for outdoor or wet locations with waterproof ratings.
- Certifications and safety features: ETL, IP ratings, and compliance with local electrical codes can affect cost.
